

## New Technology, FM Approval and More Choices.

EnviroGuard offers a wide variety of battery neutralization pillows to meet your compliance requirements. FM Approved pillows provide a solution for companies insured by FM Global and other companies with stringent requirements to protect the facility. The standard UL Listed/Certified pillow meets local city and municipality requirements where UL Listed/Certified must be used if available. An economical pillow meets compliance providing neutralization only. **Contact EnviroGuard for pillow selection to meet your compliance requirements.**

### Neutralization Pillows

Covered by one or more of the following patents

# 6,308,728 | 6,395,417 | 7,127,771 | 7,428,911 | 7,691,526 - Other Patents Pending

#### Deluxe

#### Standard

#### Economy

#### Excellent for mission critical facilities

Neutralization and absorption pillows for meeting commercial insurance, UL and all Federal, State and local codes and regulations as required by Authorities Having Jurisdiction.

- FM Approved per Approval Standard 4955 and UL Recognized per UL VXMB2
- Class 1 Fire Rated per NFPA 101

#### Ideal for critical facilities

Neutralization and absorption pillows to meet requirements where UL Listed products must be used and all Federal, State and local codes and regulations must be followed.

- UL Recognized
- Class 1 Fire Rated per NFPA 101

#### Good for non-critical applications

Economy pillows provide basic neutralization only. May not be accepted by Authorities Having Jurisdiction.

### FM Approved

EnviroGuard's FM Approved Neutralization and Absorption Pillows have undergone rigorous testing to meet FM Approval Standard 4955 to provide superior neutralization and absorption. Improved spill indicator is pH activated to ensure that it only reacts with battery electrolyte. Extensive fire testing to ASTM E648 and E2058 confirms a Class I fire rating as defined by NFPA 101 for peace of mind when specifying passive neutralization. **These pillows make an ideal replacement or new installation to meet the stringent insurance company requirements.**

### Pillow Replacement and Recycling

EnviroGuard's Pillow Replacement and Recycling Program provides a convenient and DOT/EPA approved method for the proper disposal and recycling of non-contaminated neutralization and absorption pillows. Certificates of Compliance are provided for proof of approved handling and required paper trail for compliance. **Get product credits when replacing end-of-life pillows with new for additional savings.**

Choose EnviroGuard Neutralization Pillows  
for Lead-Acid and Nickel Cadmium Battery Systems.
